A61K 38/36 (2006.01)

Abstract:

A61K 38/36

The present invention provides methods of using recombinant human fibrinogen to prevent or treat excessive bleeding in pre-hospital and hospital settings. In particular, the present invention relates to methods for treating bleeding using recombinant human fibrinogen in individuals suffering from traumatic hemorrhages in pre-hospital settings and in individuals having thrombocytopenia or qualitative platelet disorders.
INTERNATIONAL SEARCH REPORT

International application No
PCT/IL 08/00599

A CLASSIFICATION OF SUBJECT MATTER
IPC(8) - A61 K 38/36 (2008.04)
USPC - 514/2; 530/382
According to International Patent Classification (IPC) or to both national classification and IPC

B FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
USPC 514/2; 530/382

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
PubWEST (USPT, PGPB, EAPB, JPAB), Google Scholar
search terms fibrinogen, human, transgenic, mammal, animal, milk, recombinant, bleeding, platelet, eukaryotic injection, infusion, coagulation

Further documents are listed in the continuation of Box C

"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O" document referring to an oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed
"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"&" document member of the same patent family
