(54) Title: SYSTEM AND METHOD FOR REMOTE PRESENTATION PROVISION

(57) Abstract: A method of receiving and playing a composite video, wherein the composite video includes at least a video asset and a non- video asset in separate files. The method comprising: receiving the non- video asset; receiving at least a portion of the video asset; buffering the at least a portion of the video asset in a buffer; delaying playback of the composite video until (a) the non- video asset is downloaded and (b) the at least a portion of the video asset received is sufficient under existing conditions that the video asset can be played in real time without emptying the buffer before the end of the video asset; and playing, after the delaying, the composite video.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
