BACKGROUND OF THE INVENTION

[0004] The present invention relates to a baby accessory car seat satchel. Currently, the organization of items and the number of carriers to transport them has made travel for the new parent an inconvenient affair. Baby bags are designed for a full days worth of going out, and are thusly large enough to be inconvenient for a parent already carrying their infant.

[0005] The Applicants invention is used to eliminate this problem. Applicant is unaware of any previous art that addresses this issue.

[0006] The object of the invention is to provide a medium sized satchel containing compartments for necessities and which attaches to an infants car seat, making shorter distance travel a more convenient experience for parents traveling alone with their infant(s).

[0007] The Applicant's invention removes the need for the transport of a diaper bag and essentials carrier, as well as freeing the hands of the parent as the satchel can hang from the end of the infants carrier or from a detachable strap.

BRIEF SUMMARY OF THE INVENTION

[0008] The present invention relates to a baby accessory car seat satchel. The present invention includes the following interrelated objects, aspects and features::

[0009] (A) In a first aspect, the invention includes a bag made of fabric with two auxiliary pockets on opposite ends.

[0010] (B) In a second aspect, the invention includes a detachable strap.

[0011] (C) In a third aspect, the invention is designed to attach to car seats, stroller or infant carrier.

These and other objects, aspects and features of the present invention will be better understood from the following detailed description of the preferred embodiment when read in conjunction with the appended DRAWING FIGURES.

BRIEF DESCRIPTION OF THE DRAWINGS

[0012] FIG. **1** shows a frontal perspective view of the present invention in the open position with the tongue of the closure behind the satchel.

[0013] FIG. **2** shows a perspective view of the present invention and the imperative components as relating to the inventions method of attaching to carriers.

[0014] FIG. **3** shows a perspective view of the present invention and the imperative components as relating to the inventions method of attaching and detaching the strap.

DETAILED DESCRIPTION OF THE INVENTION

[0015] With reference to FIG. **1**, the baby accessory car seat satchel is designated by the reference numeral **1**. The tongue **2** is shown in position with the bag open, wherein the tongue is behind the satchel. Two auxilliary pockets **3** are displayed as existing on either side of the satchel. The elastic loops **4** are stretched to wrap around the Vehicle Belt Hooks located under the handle of the car seat. The elastic pocket **5** stretches over the bottom of the car seat, holding the bag in place in conjunction with the elastic loops **4**. Also displayed are two metal loops **6** which can be tucked inside the bag and are used to attach or detach the strap (not shown (See FIG. **3**).

[0016] With reference to FIG. **2**, the baby accessory car seat satchel is designated by the reference numeral **1**. The elastic pocket **5** is stretched over the bottom of the car seat while the elastic loops **4** are enabled to lock/unlock onto a child carrier or car seat by means of stretching them over the Vehicle Belt Hooks **8** located under the handle of the car seat, stroller or carrier, making the satchel easy to remove from the child carrier or seat.

[0017] With reference to FIG. **3**, the baby accessory car seat satchel is designated by the reference numerals **1**, and is again shown in the open position without the tongue closure noted. The two inch plastic crab claw-type findings **9** on the strap **7** are easily attached or detached from the metal loops **6** onto the satchel **1** by means of a standard spring-held crab claw design.

[0018] Accordingly, an invention has been disclosed in terms of a preferred embodiment thereof which fulfills each of the objects of the present invention as set forth hereinabove and provides a new and useful baby accessory car seat satchel.

[0019] Various changes, modifications and alterations in the teachings of the present invention may be contemplated by those skilled in the art without departing from the intended spirit and scope thereof.

[0020] It is intended, therefore, that the present invention only be limited by the terms of the appended claims.

I claim:

1. A baby accessory car seat satchel, comprising:

an ability to attach to child carriers, strollers and car seats.

2. The baby accessory car seat satchel of claim **1**, wherein the satchel is comprised of one large pocket and two smaller accessory pockets.

3. The baby accessory car seat satchel of claim **1**, utilizes a detachable strap.
