(54) Title: COMBINATION MOP BUCKET AND WRINGER UNIT

(57) Abstract: A combination of a mop bucket and a wringer unit (10) is disclosed in which the bucket (12) has a bottom surface (16), and a peripheral wall (18) which upstands from the bottom surface (16), the wringer unit (14) being supportable on an upper edge (30) of the peripheral wall (18) of the mop bucket (12), and being releasably engagable from the bucket, there being releasable engaging means including a pivotable clip (74) on each of two opposing sides of the combination mop bucket and wringer unit (10) and an engagable element (76) with which a respective pivotable clip (74) can be snap-fit releasably engaged, each pivotable clip (74) being formed independently of the mop bucket (12) and the mechanical press wringer (14) and being pivotably engaged with one of the mop bucket (12) and the mechanical press wringer (14), and the engagable element (76) being provided on the other one of the mop bucket (12) and the mechanical press wringer.

A. CLASSIFICATION OF SUBJECT MATTER
INV. A47L13/58

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
A47L B65D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
