Title: FREE-STANDING PHOTO STRIP

Abstract: A self-photograph system (10) that produces a strip (10) having a number of photographs. The system includes a camera (51) for capturing one or more images of a user, at least one printer (56, 57) for printing one or more captured images, and photographic paper (10) loaded in each of the printers, the paper having one or more weakened fold (12, 14, 16) lines that divide the paper into at least two contiguous print areas, with a captured image printed in at least two such print areas, the printed images arranged on the paper either horizontally or vertically.
