DES. 1987

Letter Patent, 1987 Dated Sept 30th 1884

Design for a Pump

The schedule referred to in these Letters Patent and making part of the same,

To all whom it may concern:

Be it known that I, George Downing, of Seneca Falls, Seneca County and State of New York, have invented or produced a new and original design for a Pump; and I do hereby declare that the following is a full and exact description of the same.

The body of the pump above the cylinder where the piston works is made with swells and depressions with holes for the water to discharge into a spouted circular basin fastened to a stem made on the pump for that purpose, all ornamented and shaped as clearly shown in the accompanying drawing forming a part of this specification.

What I claim is the design for a pump as shown and described.
