Title: SEPARABLE URL INTERNET BROWSER-BASED GAMING SYSTEM

Abstract: A system and method for enabling one network (112) to use the functionality of another network (113) is provided. The system comprises a first network system (112) having a first network functionality and a second network system (113) having a second network functionality. A server (130) connected to the second network system (113) passes directions through the first network (112) to enable a component connected to both the first network system and the second network system to perform a second network functionality.
