(54) **Cooled connecting element for combination of several heat generators**

(57) The present invention relates to a primary generator (GP), such as a boiler for space and/or domestic water heating, to which a secondary generator (GS), for

example a thermoelectric cogenerator, is connected by way of a connecting element (1) and the head (3) of the secondary generator is cooled by the thermal carrier fluid circulating in the primary generator (GP).
