5999X

S. Nisbet.

Plow.

Patented May 25, 1830.

N. PETERS, PHOTO-LITHOGRAPHER, WASHINGTON D. C.

5999X

UNITED STATES PATENT OFFICE.

SAMUEL NISBET, OF TOBOYNE TOWNSHIP, PERRY COUNTY, PENNSYLVANIA.

IMPROVEMENT IN PLOWS.

Specification forming part of Letters Patent dated May 25, 1830.

To all whom it may concern:

Be it known that I, SAMUEL NISBET, of Toboyne township, Perry county, State of Pennsylvania, have invented an Improvement in Plows, of which the following is a specification.

This plow consists of the following principal parts, viz: first, the mold-board and sheth; second, the wrought-iron share; third, the colter; fourth, the beam and handles.

First. The mold-board and sheth are made of cast-iron and cast together solid. There is a tenon in the lower part of the sheth, that sets into the socket of the share. The sheth or mold-board extends up through the beam, and has two projections cast on it, one on each side, on which the beam rests. A bar extends from the sheth on the land side to the mold-board on the inner side, which acts as a stay and support to both the sheth and mold-board, and is cast solid with them.

Second. The share is made of wrought-iron, and is of the common form and size.

Third. The colter is made of wrought-iron and of the common shape and size.

Fourth. The beam and handles are made of wood and of the common shape and size.

What I claim as my invention is—

The construction of the mold-board and sheth, as before described.

For a further illustration of my invention I refer to the model and drawing of the same deposited in the Patent Office.

In testimony that the foregoing is a true description of my invention I have subscribed my name hereunto before two witnesses, and made oath to the same at the city of Washington, this 15th day of May, 1830.

SAMUEL NISBET.

Witnesses:

WM. RAMSEY,

W. P. ELLIOT.
