UNITED STATES PATENT OFFICE.

HENRY T. HENDERSON, OF KEOKUK, IOWA.

DESIGN FOR A BED-PLATE FOR TIRE-SETTING MACHINES.

SPECIFICATION forming part of Design No. 34,937, dated August 13, 1901.

Application filed July 10, 1901. Serial No. 67,798. Term of patent 7 years.

To all whom it may concern:

Be it known that I, HENRY T. HENDERSON, a citizen of the United States, residing at Keokuk, in the county of Lee and State of Iowa, have invented and produced a new and original Design for a Bed-Plate for Tire-Setting Machines, of which the following is a specification, reference being had to the accompanying drawings, forming part thereof.

Figure 1 is a perspective view of the bed-plate, showing my design. Fig. 2 is a sectional view thereof.

As shown in the drawings, the bed-plate includes the portion a' , which is of annular form and carries on its upper face the channels a^2 a^3 , extending radially. It also includes the upwardly-extending rim or flange

a^3 , bounding the annular portion a' , through which pass openings a^4 a^4 . The channels a^2 a^3 are shown as of greater transverse dimension at the bottom than at the top.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a bed-plate for a tire-setting machine as herein shown and described.

In testimony whereof I have signed my name to this specification in the presence of two witnesses.

HENRY T. HENDERSON.

Witnesses:

WILLIAM C. HOWELL,
HERBERT M. LOURIE.
