#### (54) Title: HELICALLY WRAPPED INTERLOCKING STENT

#### (57) Abstract

The present invention concerns expandable stent (10) for supporting a body lumen formed from an elongate strip (12) of biocompatible material that is helically wrapped into a tubular shape. The strip is formed with a tongue (14) extending along one edge (15) and a groove (16) along the other (17). The tongue is slidably received in the groove as the strip is wound into helical wraps (13) that form a tube. The tongue and groove engagement interlocks the wraps to maintain the tubular shape. Sliding of the tongue within the groove permits the wraps to slide relative to each other causing the diameter of the stent to be increased or decreased. An increase in the stent diameter corresponds to

a decrease in the length of the stent and vice versa. Thus the stent can be delivered to a vessel site in reduced diameter long length configuration, then deployed by compressing its length to cause expansion. Preferably, the stent is formed from a polymeric and bioabsorbable material that can be loaded with a pharmaceutical to provide localized drug delivery.

## INTERNATIONAL SEARCH REPORT

| Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)  |          |  |  |  |  |
|--|----------|--|--|--|--|
| This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:   |          |  |  |  |  |
| 1. X Claims Nos.: 11-17 because they relate to subject matter not required to be searched by this Authority, namely:  Rule 39.1(iv) PCT - Method for treatment of the human or animal body                                   | by       |  |  |  |  |
| surgery  |          |  |  |  |  |
| Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:   | 1        |  |  |  |  |
| Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4   | (a).     |  |  |  |  |
| Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)  |          |  |  |  |  |
| This International Searching Authority found multiple inventions in this international application, as follows:  |          |  |  |  |  |
| see additional sheet   |          |  |  |  |  |
| As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.   |          |  |  |  |  |
| 2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payme of any additional fee.  | ent      |  |  |  |  |
| 3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:                      |          |  |  |  |  |
| 4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  1-10,18 | š        |  |  |  |  |
| Remark on Protest  The additional search fees were accompanied by the applicant's purpose to protest accompanied the payment of additional search fees.  | protest. |  |  |  |  |

### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

1. Claims: 1-10,18

A tubular, helical stent with interlocking edges.

2. Claims: 19-21

A stent and delivery system
