(54) Title: IMPROVED WIND TURBINE BLADE CONTROL

Fig. 3

(57) Abstract: The invention relates to a wind turbine blade (5) comprising at least one flow modifying device (51) adapted to modify the airflow so as to provide a control force (CF), located downwind of a shear centre (SC) of the blade (5), so as for the blade (5) to twist to provide a change (dAF) of a lift force (AF1, AF2) on the blade (5), the lift force (AF1, AF2) including the control force (CF), the change (dAF) being positive in a direction opposite to the direction of the control force (CF).

A. CLASSIFICATION OF SUBJECT MATTER
INV. F03D1/06 F03D7/02
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
F03D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EP0-Internal

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
