(54) Title: ALKYLTHIOBENZYLPIPERIDINE COMPOUNDS

(57) Abstract: This invention is directed to alkylthiobenzylpiperidine compounds which are ligands at the MCH1 receptor. The invention provides a pharmaceutical composition comprising a therapeutically effective amount of a compound of the invention and a pharmaceutically acceptable carrier. This invention also provides a method of treating a subject suffering from depression comprising administering to the subject a therapeutically effective amount of a compound of the subject invention. This invention further provides a method of treating a subject suffering from anxiety comprising administering to the subject a therapeutically effective amount of a compound of the subject invention. This invention also provides a method of treating a subject suffering from obesity comprising administering to the subject a therapeutically effective amount of a compound of the subject invention. Furthermore, the present invention is directed to the use of a compound of the subject invention for the manufacture of a medicament for treating a subject suffering from depression, anxiety or obesity.
