(1) **Inhibition of Benzold-Jarisch reflex**

**Test Method:**

Male Sprague-Dawley rats weighing 260-350 g were anesthetized intraperitoneally with 1.25 g/kg urethane. Blood pressure and heart rate were monitored continuously from the left common carotid artery with a pressure transducer. A right femoral vein was con...
for the intravenous injection (iv) of drugs. The trachea was also cannulated to ease the respiration.

Rats were given a rapid bolus injection of 2-methyl-5-hydroxytryptamine (32 µg/kg, iv) to establish the control bradycardic response. Once the heart rate returned to base line, the rats were given the test compound (iv), followed by 5-minutes interval and another bolus injection of 2-methyl-5-hydroxytryptamine (32 µg/kg, iv).

A mixture of 8-chloro-4,4-dimethyl-4H-pyrrolo[2,1-c]-[1,4]benzoazaine-6-carboxylic acid (1.0 g) obtained in Preparation 3, 1,3-dicyclohexylcarbodiimide (743 mg), 1-hydroxybenzotriazole hydrate (551 mg), and N,N-dimethylformamide (15 ml) was stirred at room temperature for 1 hour. To this mixture was added a solution of 1-azabicyclo[2,2,2]octyl-3-amine (0.50 g) in N,N-dimethylformamide (5 ml). After 10 minutes, the mixture was treated with triethylamine (0.50 ml) and then stirred at room temperature for 14 hours. The precipitate formed was filtered and the filtrate was evaporated in vacuo. The residue was diluted with water, made basic with 3N aqueous sodium hydroxide solution, and extracted three times with dichloromethane. The organic layer was washed with water and brine, dried over anhydrous sodium sulfate, and evaporated in vacuo. Column chromatography on silica gel (10% methanol-chloroform) of the residue gave an oil (1.18 g), which was treated with hydrogen chloride in ethanol and crystallized from methanol-ether to give N-(1-azabicyclo[2,2,2]oct-3-yl)-8-chloro-4,4-dimethyl-4H-pyrrolo[2,1-c][1,4]benzoazaine-6-carboxamide hydrochloride (1.02 g).

International Searching Authority:

EUROPEAN PATENT OFFICE

Signature of Authorized Officer:

LUYTEN H.W.
**INTERNATIONAL SEARCH REPORT**

**PCT/JP 92/01220**

### Box I  Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. □ Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
   
   **Remark:** Although claim 9 is directed to a method of treatment of (diagnostic method practised on) the human/animal body the search has been carried out and based on the alleged effects of the compound/composition.

2. □ Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. □ Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

### Box II  Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. □ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. □ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. □ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. □ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

**Remark on Protest**

□ The additional search fees were accompanied by the applicant's protest.

□ No protest accompanied the payment of additional search fees.
