(54) Title: REMOTE CONTROL OF A SPEAKER PHONE DEVICE AS A STANDALONE DEVICE OR AS PART OF A SE-  
CURITY SYSTEM(57) Abstract: A telephone device such as a  
speaker phone or message recording device is  
remotely controlled either as a standalone device  
or as part of a security system. The telephone  
device can be controlled by a key fob or other  
user-operated transmitter that a user actuates to  
answer a call by speaker phone, end a call, place a  
call, or control functions of the message recording  
device such as playing back messages. The key  
fob transmits a wireless signal that is received and  
processed by a security system. In response, the  
security system controls the telephone device. The  
key fob may control security functions as well.  
In another approach, the key fob may control the  
telephone device directly without intervention of  
a security system. Or, the key fob may control the  
telephone device via a home automation network.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC: **H04M 11/04,11/00**

USPC: 379/37,102.10,37-51

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 379/37, 102.10, 37-51

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
