

United States Patent Office.

STEPHEN S. DAVIS, OF EDGERTON, WISCONSIN.

Letters Patent No. 92,587, dated July 13, 1869; antedated June 30, 1869.

IMPROVED COMPOUND FOR CURING PILES.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, STEPHEN S. DAVIS, of Edgerton, in the county of Rock, and in the State of Wisconsin, have invented a certain new and useful Compound for Curing Piles, Boils, &c.; and do hereby declare that the following is a full, clear, and exact description thereof.

The nature of my invention consists in a compound which will cure any eruptions, swellings, &c., arising from the impurity of the blood, by throwing the blood even in the system.

This compound consists of four-fifths of mutton-tallow and one-fifth of deodorized benzine, to which is added a small quantity of gum-camphor and oil citronella, or any other essential oil.

The quantities of camphor and essential oil may be varied according to the nature of the disease.

This compound will cure piles, boils, toothache, cuts, sores, bruises, swellings, and any eruptions which may be attributed to the impure state of the blood.

What I claim as new, and desire to secure by Letters Patent, is—

The above-described compound, when made of the ingredients and substantially in the proportions herein set forth.

In testimony that I claim the foregoing, I have hereunto set my hand, this 11th day of December, 1868.

Witnesses:

STEPHEN S. DAVIS.

J. P. TOWNE,

LEOPOLD EVERT.
