(54) Title: TRANSLUCENT COMPOSITION COMPRISING SILICA AEROGEL PARTICLES

(57) Abstract: One subject of the present invention is a translucent cosmetic composition in the form of an oil-in-water emulsion comprising: (1) a dispersed fatty phase comprising at least one oil; (2) a continuous aqueous phase comprising at least one hydrophilic thickening polymer; and (3) hydrophobic silica aerogel particles; the ratio of the amount by weight of silica aerogel particles to the amount by weight of oil(s) being greater than 0.06; the composition being free of surfactant(s). The composition in accordance with the invention is in the form of an emulsified gel of translucent appearance which makes it possible to obtain good cosmetic properties such as a sensation of freshness on application and a satisfactory nutritive efficacy.

\* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
