No. 738,287. Patented September 8, 1903.

UNITED STATES PATENT OFFICE.

MARY ENGLE BROWN, OF PITTSBURG, PENNSYLVANIA.

CURTAIN-SUPPORT.

SPECIFICATION forming part of Letters Patent No. 738,287, dated September 8, 1903.

Application filed December 5, 1902. Serial No. 134,055. (No model.)

To all whom it may concern:

Be it known that I, MARY ENGLE BROWN, a citizen of the United States, residing at 7047 Hamilton avenue, Pittsburg, in the county of Allegheny and State of Pennsylvania, have invented a new and useful Curtain-Support, of which the following is a specification.

My invention relates to a curtain-support in which the curtain is supported by being hung over a number of suitably-arranged points or pins.

The object of my invention is to provide a curtain-support without the use of the ordinary rings and pins.

I obtain the object of my invention by the method illustrated in the accompanying drawings, in which—

Figure 1 is the elevation of the complete support, and Fig. 2 a cross-section taken through the center.

Similar letters refer to similar parts throughout both views.

The bracket B constitutes the support of the pole A and the clamping-bar C and is so made in respect to the shape of the pole A that the pole cannot rotate within its support. In the pole A are placed a number of projecting points or pins D, over which is hung the curtain, which may then be clamped in position by the bar C.

What I claim as my invention, and desire to secure by Letters Patent, is—

A curtain-support comprising the combination of brackets in which the curtain-pole is held from rotation on its axis, supplementary arms on said brackets, said curtain-pole, pins on said curtain-pole adapted to be inserted in the material of a curtain, a supplementary imperforate bar adapted to be held in the supplementary arms on the bracket and clamp the material of a curtain against a side of the curtain-pole not provided with pins.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

MARY ENGLE BROWN.
