(54) Title: PROCESS FOR MAKING A MULTICOMPONENT THREAD AND MULTICOMPONENT THREAD THUS
MADE

Fig. 2

(57) Abstract: The process for making a multicomponent
thread (12) composed of a first fibre and a second fibre sol-
uble in an environment wherein the first fibre is insoluble,
consists in making a first thread (10) using only the first fi-
bres that are twisted with S or Z twist, then twisting the first
thread (10) with a second thread (11) using only the second
fibres and making the multicomponent thread. The first
thread (10) and the second thread (11) are twisted with the
same S or Z twist used for twisting the first thread during
the make thereof. The finding also relates to a thread made
by such process and to a fabric made with such thread.

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
