(54) Title: SIDE-RELEASE BUCKLE ASSEMBLY

(57) Abstract: A buckle assembly includes a first connection member and a second connection member. The first connection member includes engagement members, such as buttons. The second connection member is configured to connect to the first connection member, and includes openings in which the engagement members are retained when the first connection member is connected to the second connection member. The second connection member also includes release arms configured to be actuated to engage the engagement members in order to disconnect the first connection member from the second connection member.
