William Resor, Cincinnati, Ohio.

Letters Patent (Design No 47) dated 23d. May, 1846.

The schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, William Resor, of the City of Cincinnati, in the County of Hamilton and State of Ohio, have invented and produced a new Design for ornamenting a stove, which is also in part new in its shape or configuration; and I do hereby declare that the following is a full and exact description thereof:

The general shape or configuration of my stove, with the ornaments thereon, are shown in fig. 1 of the accompanying drawings. There is a collar A on the upper plate of the stove which is to receive the upper cooking utensils which is circular at its ends A', and is concave on the sides as at A; there being a square projection on each side of the end, said shape being distinctly shown in fig. 2 which is an outline of this part taken in a direct top view - This collar is surrounded by a leafing such as is distinctly shown in fig. 1.

The ornament around the top plate of the stove, is such as is delineated at FF, the ornament around the hearth is shown at BB and most distinctly in fig. 3, which is a direct top view of this part. The sliding part of the hearth plate as shown at C has on it the figure of a Phoenix; and is accompanied by the words "Phoenix Premium". This part, it is manifest, however, may be changed and the general shape, and the ornaments on the other parts remain as herein designated. The doors D, D, D, one

parts. The side plate, or oven door E, shown separately in fig. 5 has an ornamental rim, with vine leafing, a bunch of grapes and the words "Resors Patent," in ornamental letters as designated:

Having thus fully set forth and represented the configuration of my stove, and the manner in which I form and distribute the ornaments thereon, what I claim as new and desire to secure by Letters Patent, is the exclusive right to a stove so formed and ornamented -
