(54) Title: A COLLECTION DEVICE AND METHOD OF USING SAME

(57) Abstract: The present invention relates to a collection device (1) for solids material and fluid being directed from a first location on a seabed, on an offshore installation, or onshore, and to a second location, wherein the fluid conducts the solids material in through an inlet portion (7) in a solids collection device (1') provided with one or more permeable portions arranged to retain solids material in excess of a predetermined size, wherein the collection device (1) is further provided with a fluid collection device (1'') arranged to be able to collect at least a portion of the fluid evacuating out through the solids collection device (1'). The invention also relates to a method for use of the collection device (1).
