(54) Title: PAYMENT DEVICE WITH AUDIO AND/OR VISUAL CAPABILITY AND ASSOCIATED METHOD

Fig. 2

(57) Abstract: A payment device includes a memory, a processor coupled to the memory, a communications module coupled to the processor and configured to interact with a payment terminal, a sound-producing element coupled to the processor, and an associated body portion. The memory is configured to store at least one representation of at least one sound and the processor is configured to cause the sound-producing element to produce a sound corresponding to the at least one representation of the at least one sound when such representation is stored in the memory, responsive to the communications module interacting with the payment terminal, substantially without usage of a battery on the device. Visual stimuli can be employed in addition to or in lieu of sounds. Sounds can be downloaded to devices with or without batteries, as part of a service offering.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
