(54) Title: A METHOD AND SYSTEM FOR SYNCHRONIZING PRESENTATION OF A DYNAMIC DATA SET TO A PLURALITY OF NODES

(57) **Abstract:** A method for synchronizing presentation of a dynamic data set to a plurality of nodes. The method includes the step of generating, by a consumer node in a plurality of nodes, a plurality of data packets representing a change to a dynamic data set. A host node in the plurality of nodes receives the plurality of data packets. The host node transmits to a synchronization engine the plurality of data packets. The synchronization engine generates metadata information representing the difference between the dynamic data set and the plurality of data packets. The synchronization engine transmits to the plurality of nodes the metadata information and the plurality of data packets.

A. CLASSIFICATION OF SUBJECT MATTER
INV. H04L29/08 H04L12/18

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
EPO-Internal, WPI Data, INSPEC

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
