DES. 2196

Isaac A. Sheppard, of Philadelphia, Penn.^a

Letters Patent No. 2196 Dated Oct. 10-1865.

Design for the Plates of a Cookstove.

The schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, Isaac A. Sheppard, of Philadelphia, County of Philadelphia, State of Pennsylvania, have invented or produced a new and original design for plates of the "Columbia" cook stove and I do hereby declare the accompanying drawing with the following explanation of the same to form a full, clear and exact description of the said design.

In the accompanying drawing
Fig. 1 represents the front plate of the "Columbia" cook-stove.
Fig. 2, side plate, and
Fig. 3, the back plate.

Round the edges of the front plate A, the side plate B, and the back plate C, extends a beading a,

In the plate A are hung two doors C', C' and to the side plate B are hung two doors D, D' and below the door D' is a panel F, a plain beading c, extending round the said doors C', C', D, D', and the front panel F.

Above the doors of the front plate is an oblong panel which is enclosed by a beading c, and below the panel are the words "Columbia Cook."

At each side of the plate A is an ornamental fig-

2

ure C, and in the centre of each door C' is a shield which is surrounded by a wreath from which project radial ribs, as shown in fig. 1.

In the centre of the door D, and of the panel E, on the plate B is an ornamental figure similar to that on the door C'.

In the centre of the door F is a shield across which extends a belt and on the latter is the word "Columbia". The shield on the door is surrounded by a wreath and from the latter extend curved radial ribs as shown in fig. 2.

On the back plate C is an ornament similar to that on the side door F.

I claim

The ornamental figures and forms substantially as shown in and by the accompanying drawing, the whole forming an ornamental design for the plates of the "Columbia Cook Stove".

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

Witness:

Charles E. Foster

Isaac A. Sheppard
