(54) Title: USER INTERFACE FOR RECORDING PROGRAM, APPARATUS AND METHOD FOR DISPLAYING IMAGE

Figure 3

(57) Abstract: An image display apparatus includes: a tuner for receiving broadcasting signals containing electronic program guide information; a storage unit for storing the electronic program guide information received through the tuner; a display unit for displaying the broadcasting signals and the electronic program guide information; a user interface unit for receiving reservation recording conditions input by a user; and a control unit allowing a reservation recording menu screen to be displayed through the display unit, and reading a recording setting condition received through the user interface to allow a reservation recording to be set and a reservation recording to be performed. The control unit aligns information regarding broadcasting programs corresponding to the reservation recording conditions input through the reservation recording menu screen on the reservation recording menu screen.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
