(54) Title: MECHANISM FOR THE GENERATION OF ELECTRICAL AND/OR MECHANICAL POWER

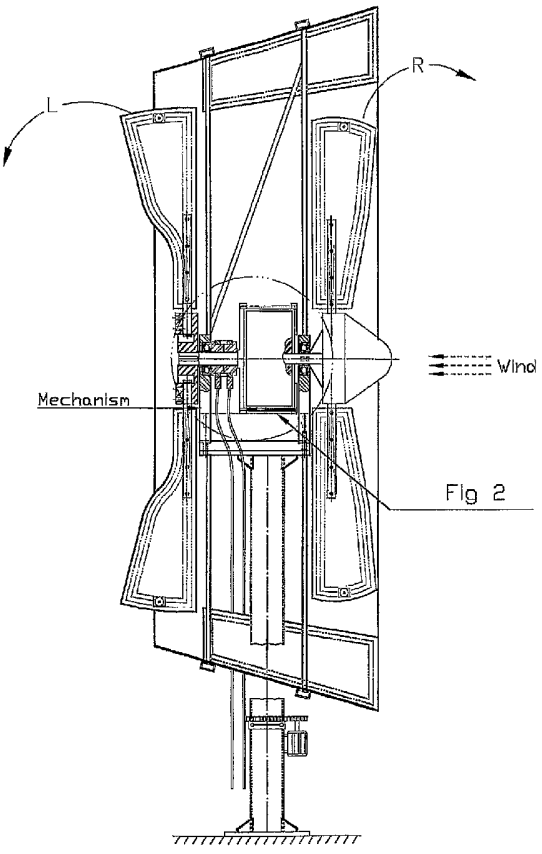

Fig 2

(57) Abstract: A device is provided which enables the rotor and the stator to rotate in opposite directions. The device may be used in combination with either a generator to generate electrical power and/or to an electric motor to generate mechanical power. The device may be used in combination with rotational power devices or turbine-type devices and may also be used in combination with a number of generators.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IL05/00857

A. CLASSIFICATION OF SUBJECT MATTER
IPC: **F03D 9/00**(2006.01)

USPC: 290/54,55
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
U.S. : 290/54, 55

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
US PTO APS EAST

C. DOCUMENTS CONSIDERED TO BE RELEVANT

☒ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
