Jonas P Faitland

Letters Patent.

The Schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said J P Faitland himself of his improvement in making planes and Sections of Railways to be used in Cross and Branch Railways & common Roads crossing the same

Specification of a new and useful improvement in constructing cross Railways for the passage of Railway Carriages thereon in any cross direction, also for changing the direction at any place of Railways the invention of the subscriber.

Provide a circular plane movable at pleasure upon its centre, resting upon Rollers, and moved by a pivot wheel geared into face or other cogs placed in said horizontal circular plane upon which plane I construct Railways corresponding and uniting as moved around with the Railways in any given direction. The manner of using this plane is manifest. When a carriage is about to cross either way nothing more is necessary than to place the Railway on said plane to unite with the Rail Road in the required direction. If it is required to change the direction of the carriage not crossing the Rail Road the carriage must be received on said platform and then all moved around together to the given direction
