(54) Title: MOUSETRAP WITH DISPOSABLE, HERMETICALLY SEALING CARTRIDGE AND INTERNAL HIGH-
VOLTAGE KILLING MECHANISM(57) Abstract: A hermetically sealing, en-
closure-type mousetrap is provided having a
reusable housing and a disposable cartridge
that contains an internal high voltage killing
mechanism. Upon entry of a mouse into the
cartridge through a rodent access opening,
the opening is closed and the mouse is killed
using the high voltage mechanism. Closure
of the door hermetically seals the cartridge
with the dead mouse inside, after which the
cartridge can be disposed of without any
contact between the user and the carcass
along with any parasites and pathogens asso-
ciated therewith.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
