Portable, folding book-rest with adjustable incline.

The object of this invention is the realization of a portable, folding book-rest in book form, with adjustable incline which can be used for any reading and/or writing situation. It consists essentially of an adjustable, reclining support on which the text is placed. The support is hinged on a horizontal-supporting base (4) and set on a bracket (7). The bracket is conveniently hinged on the horizontal base and can rotate to a certain degree supporting the text-supporting base (1) and providing, through its range of movement, the incline for the text itself. The text-supporting base contains useful devices which, together with the above-mentioned characteristics, give this invention its individuality.

The present search report has been drawn up for all claims.

Place of search: The Hague
Date of completion of search: 07 February 91
Examiner: DE GROOT R.K.

CATEGORY OF CITED DOCUMENTS

X: particularly relevant if taken alone
Y: particularly relevant if combined with another document of the same category
A: technological background
O: non-written disclosure
P: intermediate document
T: theory or principle underlying the invention
E: earlier patent document, but published on, or after the filing date
D: document cited in the application
L: document cited for other reasons
S: member of the same patent family, corresponding document
