(54) Title: PREPARATION OF EXTRACT LIQUOR OF GRUBS, E. SIEBOLDIANUS BLUME, R. COREANUS MIQ, UNJI, ALOE AND BOX TREE MIXTURE; AND THEIR USE

(57) Abstract

The remedies for gastric ulcer, hemorroids and purulent skin diseases are successfully obtained by mixing E. Sieboldianus BLUME (Chambitsalnamu), R. coreanus MIQ (Bogbunjaddalgi) and Unji Mushroom (Unjibeoseot) belonging all to wild plants, aloe and box trees (Hoehyang) with grubs, and by mixing with liquor to be ageing, ripened. Particularly, the above remedies have excellent efficacy in curing the diseases completely through one time use.

PREPARATION OF EXTRACT LIQUOR OF GRUBS,E.SIEBOLDIANUS BLUME,R.COREANUS MIQ,UNJI,ALOE AND BOX TREE MIXTURE; AND THEIR USE

TECHNICAL FIELD

This invention relates to a preparation of alcoholic extracting liquor of the mixture of grubs belonging to larvae,E.Sieboldianus BLUME(Chambitsalnamu), R.coreanus MIQ(Bogbunjaddalgi) and Unji Mushroom (Unjibeoseot) belonging all to wild plants,aloe and box trees (Hoehyang) ; and their use for the remedies of gastric ulcer,hemorroids and purulent skin diseases.

This invention relates to a preparation methods of the remedies for curing effectively to gastric ulcer,hemorroids and various skin diseases which are caused by various internal and external causes. In the invention,a preparation method of the remedies is intended to be introduced, and under the above method,grubs belonging to larvae,E.Sieboldianus BLUME(Chambitsalnamu),R.coreanus MIQ(Bogbunjaddalgi) and Unji Mushroom(Unjibeoseot) belonging all to wild plants,aloe and box trees(Hoehyang) are used as the main raw materials, and the remedies are prepared by mixing them with liquor having 40 percent alcohol to be ripened.

BACKGROUND ART

Many kinds of existing remedies for gastric ulcer,hemorroids and purulent skin diseases are liquid or powder or ointments which mostly use chemical extracts as their main raw materials. It is known that they are applied to the affected part or taken internally,showing efficacy in curing gastric ulcer,hemorroids and purulent skin diseases in their own way. However, such various kinds of remedies as indicated above have rather produced ill effects on the patients who have a diathesis,and accordingly,

the patients have been accompanied by the difficulty and inconvenience of using the remedies selectively.

DISCLOSURE OF INVENTION

The invention,active research was conducted to solve the above problems. As a result, the remedies for gastric ulcer,hemorroids and purulent skin diseases are successfully obtained by mixing E.Sieboldianus BLUME(Chambitsalnamu),R.coreanus MIQ(Bogbunjaddalgi) and Unji Mushroom(Unjibeoseot) belonging all to wild plants,aloe and box trees(Hoehyang) with grubs , and by mixing with liquor to be ageing and ripened. Particularly, the above remedies have excellent efficacy in curing the diseases completely through one time use.

The invention is explained in detail on the basis of the examples,as follows.

The relative quantities of the mixed components to be applied to the preparation of the remedies are given below.

Liquor(40% ethanol)("Juniper" sold in the market)	2000CC
Grub	100g(20 grubs)
E.Sieboldianus BLUME (Chambitsalnamu)	50(3 branches)-120g
R.coreanus MIQ (Bogbunjaddalgi)	30(with thorn) - 60 g
Unji Mushroom(Unjibeoseot)	20-50g
Aloe	50g(without the rind)
Box tree(Hoehyang)	30g(dried)

BEST MODE FOR CARRYING OUT THE INVENTION

The preparation of the remedies to be applied in the invention, under which the raw materials are mixed at the above ratio, is explained more concretely in the following preparation examples.

Example 1

Preparation of the remedy mainly for gastric ulcer

2000 cc of liquor having 40 percent ethanol is mixed with 50g of E.Sieboldianus BLUME(Chambitsalnamu), 30g of R.coreanus MIQ (Bogbunjaddalgi) and 100g(20 grubs) of grub.The mixture is ripened for about ten(10) days, and then, it is mixed again with 50 g of aloe without the rind and ripened further for 10 days.

After one day passed under the above condition, the above ripened mixture is further mixed with 30 g of Unji mushroom(Unjibeoseot) and ripened further for one day,and then, it is mixed again with 30 g of fully dried box tree(Hoehyang). After about 10 days passed, brownish liquid is obtained. Thus, the remedy for gastric ulcer(hemorrhoids and skin diseases) can be obtained.

Example 2 (experiment)

The remedy obtained by the above method has excellent efficacy primarily in curing gastric ulcer, but it can also be used as a remedy for hemorrhoids and purulent skin diseases, showing a very high efficacy.

In the case of gastric ulcer, it has been confirmed that if a patient takes 10 cc of the remedy even once, it is highly effective for him in 15 to 30 days after.

The remedy indicated in this invention can provide a highly effective curing remedy within a short period of time for extracting because it can be prepared within about two months. However, attention should be paid to

the point that the mixture must be sealed so that air cannot infiltrate into it during the ripening process. The longer time passes after the preparation of the remedy, the better the efficacy of the remedy is.

The applicant possesses a remedy which was prepared by using liquor six years ago.

Example 3

Pareparation of the remedy mainly for hemorrhoids and purulent skin diseases

2000 cc of lipuor having 40 percent alcohol(ethanol) is mixed with 100g of E.Sieboldianus BLUME(Chambitsalnamu), 50g of R.coreanus MIQ(Bogbunjaddalgi) and 100g of grub, then, to be ripened for about 10 days. And then, the mixture is mixed again with 50g of aloe without the rind to be ripened further for 10 days. After one day passed under the above condition, the above ripened mixture is mixed with 30g of Unji Mushroom(Unjibeoseot) to be ripened. Again, after one day passed, the mixture is mixed with 30g of box tree to be ripened further for 10 days. Then, the remedy is obtained as a brownish liquid, which can be provided as a remedy primarily for hemorrhoids.

Example 4 (Experiment).

The remedy prepared by the above method is also effective in curing gastric ulcer and purulent skin diseasses. As for hemorrhoids, in the case of external ones, they can be cured completely if massage is applied to the affected part for five hours, while in the case of internal ones, they can also be cured completely if the patient takes the remedy and applies it to the affected part. In both cases, the remedy is effective in curing hemorrhoids completely through one-time treatment after 15 to 30 days passed from the treatment. It has been confirmed that, also in the case of

gastric ulcer, the remedy is highly effective in about 15 to 30 days if a patient takes it by 10 cc even once as in the Example 2.

The remedy obtained by the above method is ripened for one month, and then, the contents are crushed and ripened again for two months. After that, they are pressed into juice and filtered to obtain a liquid remedy for hemorrhoids. (It takes 1 month + 2 months = 3 months.)

As to the remedy prepared by the above method, the longer the time of storage is, the better the quality of the remedy is.

INDUSTRIAL APPLICABILITY

It is useful for the remedies of gastric ulcer,hemorroids and purulent skin diseases.

CLAIM

1. The preparation method of the remedies for gastric ulcer, hemorrhoids and purulent skin diseases that is characterized by the prepareation of brownish liquid remedies for skin diseases which can be obtained by mixing 2000 cc of liquor having 40 percent alcohol with 50 - 120g of E.Sieboldianus BLUME(Chambitsalnamu), 30 - 60g of R.coreanus MIQ(Bogbunjaddalgi) and 100g of grub to be ripened for 10 days, and by mixing the mixture again with 50g of aloe to be ripened further for 10 days, and then, by adding 20 - 50g of Unji Mushroom(Unjibeoseot) to the mixture to be ripened for one more day, and by mixing the mixture with 30g of fully dried box trees(Hoehyang) to be ripened further for about 10 days.
