D. Bulkeley,

Weather Strip,

Patented June 14, 1834.

N. PETERS, PHOTO-LITHOGRAPHER, WASHINGTON, D. C.

Dan. Bulkeley Hampton Conn

Letters Patent

8,743X

The Schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said Dan Bulkeley himself of his Improvement in the Mode of making outer doors of Houses, Store offices and other buildings called the door guard.

To all Persons to whom these presents shall come, Dan Bulkeley of Hampton in the County of Windham and State of Connecticut sends Greeting Be it known that I the said Dan Bulkeley have invented Constructed and applied & use a new and useful improvement in the mode of making outer doors of Houses &c. called the Door Guard & specified in the words following to wit My improvement in the mode of making outer Doors of Houses, Store offices and other buildings called the door guard is composed of iron tin lead brass pewter Copper or any malleable metal or wood so cut or constructed as to form a trough or Channel which is affixed to the door near the bottom extending across its whole width, and across the threshold sufficiently inclined as to cause the water as it trickles down the door to flow off to the ground instead of passing under the door into the building.

In testimony that the above is a true specification of my said improvement as above described I have hereto set my hand and seal this fifth day of May A D 1834

Dan. Bulkeley
