(54) Title: METHOD FOR THE TREATMENT OF HUMAN PERSPIRATION USING A POLYVALENT CATION SALT AND AN ANION SALT

(57) Abstract: The present invention relates to a method for the treatment of human perspiration, which comprises: (i) either the ex-temporaneous mixing of at least one composition A and of at least one composition B packaged separately and the application of the said mixture to the surface of the skin; (ii) or the application to the surface of the skin, simultaneously or sequentially, of at least one composition A and of at least one composition B packaged separately; - the said composition A comprising at least one polyvalent cation halide; - the said composition B comprising at least one non-nitrogenous salt of an anion; the said halide and the said anion salt forming in situ, on the skin, by cation/anion ionic interaction, an antiperspirant salt. The present invention relates to a method for the treatment of human perspiration resulting from perspiration, which comprises at least: (i) either the ex-temporaneous mixing of at least one composition A' and of at least one composition B' packaged separately and the application of the said mixture to the surface of the skin; (ii) or the application to the surface of the skin, simultaneously or sequentially, of at least one composition A' and of at least one composition B' packaged separately; - the said composition A' comprising at least one polyvalent cation non-halogenated salt; - the said composition B' comprising at least one anion salt; the said polyvalent cation salt and the said anion salt forming in situ, on the skin, by cation/anion ionic interaction, an antiperspirant salt.

 INV. A61K8/02 A61Q15/00 A61K8/19 A61K8/24 A61K8/36
 A61K8/365 A61K8/49 A61K8/67 A61K8/20
 ADD.
 According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
 Minimum documentation searched (classification system followed by classification symbols)
 A61K A61Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
 EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	FR 2 940 062 A1 (OREAL [FR]) 25 June 2010 (2010-06-25) cited in the application claim 1 example 20	1-20
A	----- DATABASE GNPD [Online] Mintel; July 2010 (2010-07), "Baking Soda Roll-On Deodorant", XP002674210, Database accession no. 1367919 section product description et ingredients ----- -/--	1-20

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
