
Otis A. Mygatt, Of New York, N. Y.

Design for a Shade, Reflector, or Similar Article.

Application filed June 5, 1908. Serial No. 436,996. Term of patent 14 years.

To all whom it may concern:

Be it known that I, Otis A. Mygatt, a citizen of the United States, residing at New York, in the county of New York and State of New York, have invented a new, original, and ornamental Design for a Shade or Reflector or Similar Article, of which the following is a specification, reference being had to the accompanying drawings, forming part thereof.

Figure 1 is a side elevation of my design. Fig. 2 is a bottom view of the same, showing its appearance when looking into the open mouth part of a shade or reflector embodying the invention.

My design consists of a substantially spherical body provided with a collar and a bottom opening considerably larger than the collar, the inner surface of the shade being smooth and the outer surface being covered with vertically arranged prisms. To the eye when viewed from below the reflector represents a brilliant interior portion surrounded by a darker ring-like exterior portion which appears to surround the brilliant interior portion with a frame outlined in radiating prisms.

I claim—

The ornamental design for a shade or reflector, or similar article substantially as shown and described.

Otis A. Mygatt.
