(54) **Time indication system, particularly for the indication of hour**

(57) The present invention relates to a time indication system, particularly for the indication of hours characterised in that it comprises a series of sectors (51) preferably provided one after the other one, each one representing a time reference, at least a movable indicator (6), that

can move along said sectors (51), by control means controlling said at least a movable indicator (6) and timing means, said timing means displacing said movable indicator (6) from one sector (5) to another one each preset time interval, by said control means.
