54 Retractable shed, particularly for garaging motor vehicles.

57 The retractable shed according to the invention comprises a rigid essentially arch-shaped structure (5,5') which can translate horizontally from a rest position in which it substantially adheres to a fixed support structure (1,1'), to a working position in which it is separated from said fixed structure (1,1') by a distance substantially corresponding to the desired length of the space to be covered, a retractable cover (19) interposed between said fixed structure (1,1') and said mobile structure (5,5'), and means for moving said mobile structure away from and towards said fixed structure.
