(54) Title: MOBILE TERMINAL AND MULTI-TOUCH BASED METHOD FOR CONTROLLING LIST DATA OUTPUT FOR THE SAME

[Fig. 3]

(57) Abstract: A mobile terminal including a multi-touch based system method for controlling list data output and a method for the same. The mobile terminal is capable of controlling list data output and includes: a touchscreen for generating various multi-touch events. The mobile terminal further includes a storage unit for storing lists of data items that are outputted to the touchscreen. The mobile terminal further includes; a control unit for controlling a the display of list data that are composed of multiple items for an application program in response to a currently active user function, and that changes in response to the generation of a multi-touch event, arrangement of the list data on the touchscreen according to the type of the application program to output a new list output screen.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
