(57) **CLAIM**

The ornamental design for a display panel or portion thereof with a changeable graphical user interface component, as shown and described.

**DESCRIPTION**

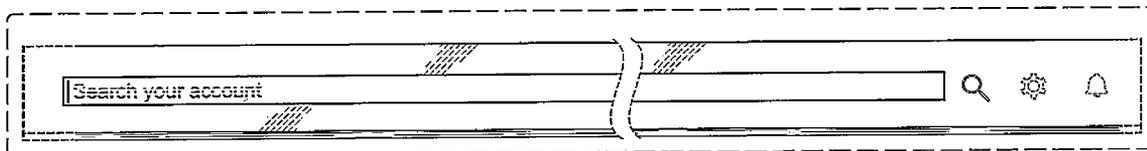

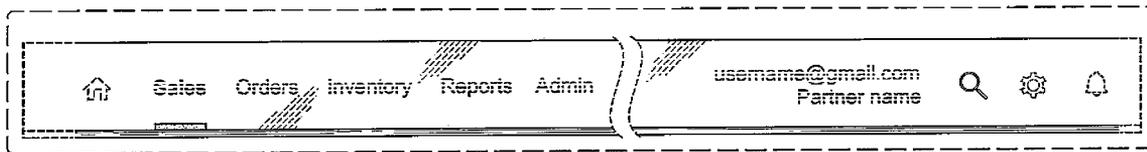

FIG. 1 is a front view of a display panel or portion thereof with a changeable graphical user interface component, comprising a first image in a sequence; and,

FIG. 2 is a front view of a second image included in the sequence.

The subject matter in this patent includes a process or period during which a computer icon image changes into another image. This process or period in which one computer icon image transitions into another forms no part of the claimed design.

The large broken lines surrounding the user interface in the figure drawings represent portions of a display panel and form no part of the claimed design. The small broken lines represent portions of the user interface and form no part of the claimed design.
