The present invention relates to a system for supplying washing inputs comprised by at least one hydraulic circuit comprising at least one water inlet pipe (2), at least one reservoir (3) of inputs and at least one input outlet pipe (4). It is further provided at least one water spreader (5) associated with at least one water inlet pipe (2) and at least one containment structure (6) associated with at least one input outlet pipe (4). According to the present invention, at least one gap (VI) is arranged between the front wall (51) of at least one reservoir (3) of inputs and the front wall (61) of at least one containment structure (6), at least one spraying means (51) of at least one water spreader (5) is directed to at least one gap (VI) arranged between the front wall (51) of at least one reservoir (3) of inputs and the front wall (61) of at least one containment structure (6), and it is generated at least one flow of inputs between the front wall (51) of at least one reservoir (3) of inputs and the front wall (61) of at least one containment structure (6).

Published: with international search report (Art. 21(3))

Date of publication of the international search report: 27 June 2013
A. CLASSIFICATION OF SUBJECT MATTER
INV. D06F39/02 A47L15/44
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
D06F A47L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>

Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents:
  * "A" document defining the general state of the art which is not considered to be of particular relevance
  * "E" earlier application or patent but published on or after the international filing date
  * "L" document which may throw doubts on priority claim(s) on which is cited to establish the publication date of another citation or other special reason (as specified)
  * "O" document referring to an oral disclosure, use, exhibition or other means
  * "P" document published prior to the international filing date but later than the priority date claimed

  * "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  * "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  * "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
  * "A" document member of the same patent family

Date of the actual completion of the international search: 27 February 2013
Date of mailing of the international search report: 18/03/2013
