(54) Title: LIPID STABILIZED FORMULATIONS

(57) Abstract: The present invention provides a lipid based system for isolating components in a pharmaceutical formulation. Also provided are methods for preparing stable pharmaceutical formulations containing at least two active ingredients. Further provided are methods of treating helminthiasis in mammals, which comprises administering a pharmaceutical composition that is highly effective against helminths, particularly tapeworm, hookworm, roundworm and heartworm of domestic animals and farm animals.

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
