**54** Procedure and prefabricated modular elements for the construction of partition and curtain walls for use inside buildings.

**57** A prefabricated modular element for constructing partitions and curtain walls, for use inside buildings formed by two brick layers (1a, 1b) connected and spaced apart by plaster septa (2), the last material also forming the outer coating (6) of said layers. The septa (2a, 2b) are shaped and arranged so as to form complementary members (7, 8) for fixed-joint connection of the modular elements to each other. The spacing of the septa is designed so as to allow laying the electrical cables and/or water mains and similar services. The use of said prefabricated modular elements results in easier and more economical procedure for the erection of double walls with respect to known techniques.
