CLAIM

The ornamental design for a blood collection safety device, as shown and described herein.

DESCRIPTION

FIG. 1 is a front elevation view of the blood collection safety device;
FIG. 2 is an exploded front elevation view thereof illustrating the internal components;
FIG. 3 is a right side elevation view of FIG. 1, illustrating in broken lines a syringe engaged with the blood collection safety device;
FIG. 4 is a top plan view thereof;
FIG. 5 is a bottom plan view thereof;
FIG. 6 is a partial cross-sectional view thereof, taken along line “6-6” according to the arrows shown in FIG. 5;
FIG. 7 is an exploded top perspective view of FIG. 1, illustrating the internal components;
FIG. 8 is an exploded bottom perspective view thereof, illustrating the internal components;
FIG. 9 is a front elevation view of the blood collection safety device of FIG. 1, illustrating in broken lines a syringe and vial engaged with the blood collection safety device;
FIG. 10 is a top plan view thereof;
FIG. 11 is a bottom plan view thereof; and,
FIG. 12 is a cross-sectional view of FIG. 10, taken along line “12-12” according to arrows shown in FIG. 10.
The features shown in broken lines depict environmental subject matter only and form no part of the claimed design.
