(54) Title: PRINTABLE CASCADING PAGES

(57) Abstract: A set of stock sheets that can be printed upon and modified to result in a set of cascading pages (20). The stock sheets are preferably a uniform size, or at least can easily be run through a printer. Tearable lines of separation extend across the sheets (22), separating a removable portion from a remainder portion. Once the sheets (22) have been printed upon, the sizes of the sheets can be modified by separating the removable portions from the remainder portions along the tearable lines. The tearable lines are offset from sheet (22) to sheet (22), thereby resulting in a set of pages varying in size, such as cascading pages (20).

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

Z document member of the same patent family
