SAFETY BELT BUCKLE

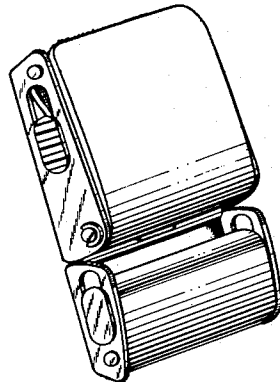

Göte Eskil Yngve Holmberg, Anderstorp, Sweden

Filed Nov. 9, 1962, Ser. No. 72,444

Claims priority, application Sweden Sept. 20, 1962

Term of patent 14 years

(Cl. D17—1)

The drawing is a perspective view of a safety belt buckle embodying my new design, and showing the left side of the buckle and the face of the buckle; the right side of the buckle is a mirror image of the left side of the buckle and the back of the buckle is conventional in appearance.

The characteristic feature of my novel design resides in the two pairs of slidable, strap-length adjustment control buttons on opposite sides of each of the two pieces comprising the buckle member, all as shown.

I claim:

The ornamental design for a safety belt buckle, as shown and described.
