(54) Title: Electric power tool
(56) Cited documents: ---
(57) Abstract:

An electric power tool (10) comprising an electric motor (11) with a motor gear (15); an output shaft (13) with an input gear (16); a coupling (17) that connects the motor gear (15) to the input gear (16); and a housing (18) that houses the motor, motor gear, coupling (17) and input gear. The coupling (17) includes a shaft portion (25) and two connective portions (26) arranged at opposite ends of the shaft portion for connection to the motor gear (15) and input gear (16), respectively, wherein at least one of the motor gear (15) and the input gear (16) has a cambered profile allowing a tilting movement of the coupling with respect to the axial position of the one of the motor gear (15) and the input gear (16) that has a cambered profile.
