(54) Title: CONTAINER WITH LID PROP AND/OR LID LATCH

(57) Abstract: A container having a base including a bottom and four walls that are connected to the bottom and define a storage space having an opening. A first and second recess define a vertical step. A lid is pivotally mounted on the base and covers at least a portion of the opening when in a closed position. A prop is arranged so that it abuts against a vertical step when the lid is in an open position thereby discouraging the lid from moving into the closed position. The prop fits substantially inside the first and second recesses when the lid is in the closed position.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
