Samuel K. Jennings

Letters Patent dated January 21. 1818.

The Schedule referred to in these Letters Patent and hereunto annexed of the same containing a description in the words of the said Samuel K. Jennings himself of his portable vapour and hot Bath.

The apparatus which is to be used as a stove and fireplace, to convey the heated gas arising from burning ardent Spirit to the body of a patient sitting in a chair, or lying on a bed Couch sofa or cot must consist of Apparatus for burning the Spirit, agreeably to the subjoined Specifications of the Bath; which may be Topical or general.

It may be made of tin, sheet Iron copper or Lead or wood &c. A cup of suitable diameter containing a proper quantity of rectified ardent Spirit is placed in the stove the fire of which is extinguished under the bed clothes or covering of the patient. The Spirit is then to be set on fire. The Gas ascends as smoke in a Chimney, and is conveyed to its destination by the flame of the Stove.
