I ansøgning nr. 437/84, som er blevet alm. tilgængelig på begæring den 31. jan. 1984, er der ingen beskrivelse, krav eller sam-mendrag på dansk, men beskrivelse og krav forefindes på engelsk.

437-84

WE CLAIM:

1. Vinyl addition emulsion polymers comprising a minor portion by weight of a residue of at least one optionally substituted compound selected from the carboxylic acid anhydrides and corresponding imides of benzene, naphthalene, biphenyl and the (C₅-C₁₀) cyclo- and bicyclo- alkanes and alkenes and the corresponding acids, provided that no residue bear fewer than two nor more than four carboxylic acid groups, and provided that at least some portion of the compound or compounds bearing such residue or residues is not present in the monomer mixture in which polymerization is first initiated.
