(54) Title: PORTABLE TABLE ASSEMBLIES

FIG. 16

(57) Abstract: An apparatus includes a table and a bench movably coupled to the table. The table and the bench collectively have a first configuration and a second configuration. The table has a first width when the table and the bench are in the first configuration. The table and the bench collectively have a first height when the table and the bench are in the first configuration. The table and the bench collectively have a second width and a second height when the table and the bench are in the second configuration. The second width is less than half of the first width, and the second height is less than half of the first height.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
