(54) Title: CAPACITIVE TOUCH SYSTEM

Fig. 23

(57) Abstract: The invention concerns a capacitive touch system comprising: an active stylus (800) configured so as to continuously emit a signal a capacitive touch device (200) configured to be in a reset phase (1000), followed by a finger touch sensing phase (2000), the finger touches being sensed exclusively during the finger touch sensing phase (2000). The capacitive touch device (200) is configured to sense the signal from the active stylus (800) during the reset phase (1000). The capacitive touch device (200) comprises at least one charge sensor (208, 213) comprising a charge sensor amplifier (305) comprising an input (CSi) and an output (csaout), and a switch (Sw1) between this input (CSi) and this output (csaout). The charge sensor amplifier (305) is arranged for conveying the signal of the active stylus (800) through a non-zero resistance value (Ron) of the switch (Sw1) during the reset phase (1000).

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
